Subject : Humble suggestion on the solution to curb black money and fake currency notes (financial terrorism) abruptly generated in India by the enemies of our country.

Respected Sir,

We appreciate our beloved Prime Minister Shri Narendraji Modi who are sincerely making efforts for bringing the black money dumped in Swiss Bank and other foreign country by the creamy layer sector of Indian Society.

Though after one year there is no desired result on this count because there are numerous hurdles on this issue viz. restrictions of international law, provisions of international treaties.

But our Prime Minister is working vigorously on this important aspect of Black money accumulated in banks of Foreign countries and we hope one. We have trust upon our dashing Prime Minister. He is the first Prime Minister who took initiative to bring our countries money from abroad for the sake of catering the basic needs of 100 crore poor people of this country. We hope our Nation will one day achieve success on this difficult task and bring back entire black money from foreign countries.

.... 2/-

We are aware about boundries of laws and in between technical problems behind bringing back money from abroad. But all these technical hurdels will not be applied while retriving black money dumped within the country. Proportionate to black money in abroad, huge black money is also dumped in within the country. So also huge Benami properties bearing value of crores of rupees is also one type of source of accumulating black money within the country. Black Money made out of various giant scams in this country is also dumped within the country. This all trend of black money within the country compelled to keep poor people more poor and rich people more rich. There is no equallibrium in between two class one class which is having every thing excess and rest of the huge class who are having every thing in minimum scale. It is our conclusion that huge black money is dumped within the country compared to wheatever black money sent to foreign country. If our respected Prime Minister pay attention to retrive black money dumped in various aspect within the country, the poverty of poor people shall vanish within one year and per capita income income of citizens will improved like any thing. But for getting success in this, Govt. has to go for some innovative solution rather than to stick up to old method within the purview of existing law. In this context, we being the patriotic social worker of this country invented a unique software which will surely help Govt. to retrive the black money and to search location of fake currency etc. We invented **Currency Tracking System** through modern technology which will help Govt. to track fake currency. If the concerned Govt. Department show interest to implement this unique software in India, We would like to come forward and shall show the demonstration of our software. This unique **Currency Tracking System** will function from its starting point from Mint to RBI, from RBI to bank and from bank to user. All things how we develop this software, how it will work and how it will be very useful cannot be practically accomodated in a single letter, but we require personal meeting from Govt.

Sir please see the recent developed activities of terrorists in India, how terrorists and pro Pakistan lobby is circulating plenty of fake currency notes in this country in order to destroy economical system of our Nation. Fake notes more than 1000 cores are being circulated in India and it is day to day increasing this is very danger system. NIA and other agencies have studied that local police are quite careless about the reports being received about fake notes. Local police do not have record of this important aspect. The conclusion contain that the fake notes is brought from Pakistan. Neighbouring country wants to hamper the economical system of our country. So the citizens of India should be alert not only dealing with market but also while doing withdrawal from bank. Our security agencies are bravely fight with the violant and bloody terrorists, but there is no instrument to easily detect the financial terrorists who are easily damaging the economical structure of our country. Now the time comes that we should seriously think upon this alarming situation and proper Act with strict provisions be invented and implemented against the financial terrorism.

Why all this happening and why there is no remedy with Govt. to curb these activities. The answer is simple, No.1 there is no powerfull act to restrain Financial Terrorism and No.2 there is no full fledge technical system with Govt. to detect fake currency note at the begginging point of circulating amongst the country. We therefore invented one new unique software to detect fake currency note for Nation.

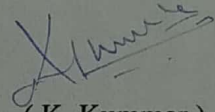

We would appeal before Your Honour to make a new Law which can be titled as “**Financial Terrorism Act.**” If any person found doing trafficking of huge fake notes, operating international Hawala Racket he may be imposed new Financial Terrorism Act ( FTA ) and please make provision in this Act like TADA who indulge in activity of fake currency note. But the innocent person who receive fake currency from bank or any place or from financial terrorist may kindly be excluded from the provisions of Financial Terrorism Act as he is the victim of vicious circle of financial terrorism being implicated by our enemy country.

All above we are doing viz. inventing unique software for detecting fake currency notes and humble suggestion to form new FTA Act are suggested out of spirit of patriotism.

With regards,

Yours Sincerely,

( K. Kummar )
